CONTENTS

PREFACE

CHARACTERISATION AND PHYSICO-CHEMICAL PROPERTIES OF HUMIC SUBSTANCES

Effects of extraction procedures on fulvic acid properties
J.E. Gregor and H.K.J. Powell (Christchurch, New Zealand) 3

Seasonal variation in composition and properties of aquatic humic substances
S. Johnsen, K. Martinsen, G.E. Carlberg, E.T. Gjessing, G. Becher and M. Lægreid (Oslo, Norway) 13

Molecular size distribution and spectroscopic characterization of humic substances
R.S. Summers, P.K. Cornel and P.V. Roberts (Stanford, CA, U.S.A.) . . . 27

Molecular weight distribution of peat humic substances extracted with different inorganic and organic solutions
A. Piccolo and A. Mirabella (Firenze, Italy) 39

Isolation and characterisation of dissolved organic carbon from natural and lysimeter waters by ultrafiltration
M. Spiteller, (Leverkusen, F.R.G.) 47

Surface active properties of soil humic acids
K. Yonebayashi and T. Hattori (Kyoto, Japan) 55

Fractionation, radioiodination and mobility in soil plates of different molecular weight fractions of humic acids
J.P. Mirave and G.A. Orioli (Bahia Blanca, Argentina) 65

Retention behaviour of Suwannee River fulvic acid components in RP-HPLC
F.Y. Saleh and D.Y. Chang (Denton, TX, U.S.A.) 67

The use of TSK size exclusion columns in determination of the quality and quantity of humus in raw waters and drinking waters
T. Vartiainen, A. Liimatainen and P. Kauranen (Kuopio, Finland) 75

2D electrophoresis of humic substances: application of a high resolution technique to polyanionic polydisperse systems
M. De Nobili, L. Leita (Udine, Italy) and P. Sequi (Bologna, Italy) . . 85

An assessment of the separation and analysis of humic substances by isoelectric focusing (IEF) method
D. Zhang and S. Lu (Beijing, China) 89

A multifactorial analysis of soil pyrograms as a criterion for discrimination between humus types
J.M. Alcañiz, A. Serés, M. Gassiot, L. Cabeza and L. Comellas (Barcelona, Spain) 97

Humic substances from deposits of a natural laboratory: A blue lake on the ice-cap (Greenland)
F. Gadel (Perpignan, France), G. Torri (Toulon, France) and A. Bruchet (Le Pecq, France) 107

Decomposition in forest humus layers studied by CPMAS ^{13}C NMR, pyrolysis-field ionization-mass spectrometry and CuO oxidation
I. Kögel, R. Hempfling (Bayreuth, F.R.G.), P.G. Hatcher (Reston, VA, U.S.A.) and H.-R. Schulten (Wiesbaden, F.R.G.) 111

Nature of plant components identified in soil humic acids
C. Saiz-Jimenez (Sevilla, Spain) and J.W. de Leeuw (Delft, The Netherlands) 115

Diborane reduction of humic substances
F. Martin, F.J. Gonzales-Vila (Sevilla, Spain) and G. Almendros (Madrid, Spain) 121

Crystal formation by low molecular weight fulvic and humic acids
S.A. Visser (Quebec, Canada) 129

Influence of photochemical reactions on the optical properties of aquatic humic substances gained from fall leaves
F.H. Frimmel and H. Bauer (München, F.R.G.) 139

Fluorescence from photic zone water in the Atlantic Ocean
M. Ewald and C. Belin (Talence, France) 149

Corrected fluorescence excitation spectra of fulvic acids - Comparison with the uv/visible absorption spectra
O.F.X. Donard, C. Belin and M. Ewald (Talence, France) 157

A note on the use of dilution to overcome quenching effects when measuring fluorescence of humic lakes
V. Pennanen and J. Mannio (Helsinki, Finland) 163

Structural features of lignins and humic substances as revealed by spin-echo and broadband decoupled C-13 NMR spectroscopy
C. Steelink and A. Petsom (Tucson, AZ, U.S.A.) 165

Structural characteristics of the IHSS Suwannee River fulvic and humic acids determined by solution state C-13 NMR spectroscopy
K.A. Thorn (Denver, CO, U.S.A.) 175

C-13 NMR characterization of humic materials isolated by an MIBK partitioning procedure
K.A. Thorn, J. Rice, R. Wershaw (Denver, CO, USA) and P. McCarthy (Golden, CO, U.S.A.) 185

Changes in dissolved organic material in Spirit Lake, Washington, USA
D.M. McKnight, K. Thorn and R. Wershaw (Arvada, CO, U.S.A.) 189

Aliphatic structures in peat fulvic acids
K.I. Hänninen (Joensuu, Finland) 193

Synthesis and characterization of humic acid-like polymers
K.I. Hänninen (Joensuu, Finland), R. Klöcking and B. Helbig (Erfurt, G.D.R.) 201

INTERACTION OF HUMIC SUBSTANCES WITH INORGANIC AND ORGANIC CHEMICALS

Investigations of interactions of transuranics and cerium with humates
R.A. Bulman, T.E. Baker and S.T. Baker (Didcot, England) 213

Inorganic and organic ligand binding of lead and cadmium and resultant implications for bioavailability
J.H. Campbell and R.D. Evans (Peterborough , Ontario, Canada) 219

Characterization of iron-fulvic acid complexes using Mossbauer and EPR spectroscopy
B.A. Goodman and M.V. Cheshire (Aberdeen, Scotland) 229

Copper (II) and iron (III) complexation by humic acid-like polymers (melanins) from soil fungi
N. Senesi (Bari, Italy), G. Sposito and J.P. Martin (Riverside, CA, U.S.A.) 241

Influence of aquatic humus and pH on the uptake and depuration of cadmium by the Atlantic salmon (Salmo salar L.)
J. John (Prague, Czechoslovakia), E.T. Gjessing, M. Grande and B. Salbu (Oslo, Norway) 253

Wetting properties of Fe and Ca humates
C. Jouany and P. Chassin (Versailles, France) 267

Binding strength evaluation of Cu(II) complexation with organic ligands of environmental interest
I. Lamy (Versailles, France), M. Cromer and J.P. Scharff (Villeurbanne, France) 271

Isotope exchange between inorganic iron and iron naturally complexed by aquatic humus
J. Sedláček (Prague, Czechoslovakia), E.T. Gjessing (Oslo, Norway) and J.P. Rambaek (Kjeller, Norway) 275

Speciation and determination of low concentrations of Cd^{2+} and Zn^{2+} in humus-rich waters by an ion-exchange method
J. Werner (Stockholm, Sweden) 281

Recoveries of some chlorophenolics and resin acids from humic water
M. Kulovaara, L. Kronberg and G. Pensar (Turku, Finland) 291

Electron donor acceptor complexes between organic nitrogen heterocycles and humic acid
U. Müller-Wegener (Göttingen, F.R.G.) 297

Adsorption of mutagens by humic acid
T. Sato, Y. Ose, H. Nagase (Gifu, Japan) and K. Hayase (Hiroshima, Japan) 305

Solubilizing action of humic acid from marine sediment
N. Shinozuka, C. Lee and S. Hayano (Tokyo, Japan) 311

Assessment of the products of reactions of drinking water disinfectants with humic substances and trace organic contaminants
P.M. Huck, S.A. Daignault, D.K. Noot, R.C. von Borstel, E. Savage, W.B. Anderson, D. Kellendonk, C.E. Rodger (Edmonton, Alberta, Canada) and D.T. Williams (Ottawa, Ontario, Canada) 315

The production of cyano-compounds on chlorination of humic acid. A comparison between terrestric and aquatic material
E.W.B. de Leer, T. Baggerman, C. Erkelens and L. de Galan (Delft, The Netherlands) 329

Photodegradation of pesticides in the presence of humic substances
U. Jensen-Korte, C. Anderson and M. Spiteller (Leverkusen, F.R.G.) . . 335

Iodine in marine sedimentary humic substances
R. Francois (Vancouver, British Columbia, Canada) 341

Acidity and humic matter in small forest lakes
P. Kortelainen, J. Mannio and I. Mäkinen (Helsinki, Finland) 343

BIOCHEMISTRY AND BIOLOGICAL EFFECTS OF HUMIC SUBSTANCES

Effect of humic substances on mitochondrial respiration and oxidative phosphorylation
S.A. Visser (Quebec, Canada) 347

Action of soil humic matter on plant roots: Stimulation of ion uptake and effects on (Mg^{2+}+K^{+}) ATPase activity
A. Maggioni, Z. Varanini, S. Nardi and R. Pinton (Padova, Italy) . . . 355

Tyrosinase activity on a humic-enzyme complex
P. Ruggiero and V.M. Radogna (Bari, Italy) 365

Inhibitory effect of humic and fulvic acids on oxidoreductases as measured by the coupling of 2,4-dichlorophenol to humic substances
J.M. Sarkar and J.-M. Bollag (University Park, PA, U.S.A.) 367

Influence of two humic extracts characterized by Py-GC on soil microbial activities
M.A. Gispert, J.M. Alcañiz (Barcelona, Spain) and P.G. Arcara (Firenze, Italy) 379

Comparison of the biological effects of humic materials under acidified conditions
R.C. Petersen, Jr. and U. Persson (Lund, Sweden) 387

Effects of aquatic humus on accumulation and acute toxicity of some organic micropollutants
J. Kukkonen and A. Oikari (Joensuu, Finland) 399

GENESIS AND TRANSFORMATION OF HUMIC SUBSTANCES

The turnover of soil organic fractions estimated by radiocarbon dating
J. Balesdent (Versailles, France) 405

Biogeochemical processes of incorporation and transformation of ^{14}C labelled fulvic acid, humic acid and simple organic molecules at the sediment-water interface (submarine canyon of the NW Mediterranean)
R. Buscail and F. Gadel (Perpignan, France) 409

Humin susceptibility to microbial decomposition in a mollic vitrandept soil by "in vitro" experiments
A. Ramunni, R. Scialdone, V. Pignalosa and A. di Gennaro (Portici, Italy) 413

Genetic relationships among the main classes of soil humic compounds
A. Ramunni, R. Scialdone, V. Pignalosa and A. di Gennaro (Portici, Italy) 419

Biodegradation of humic acids from New Zealand soils
R.S. Swift (Canterbury, New Zealand), G. Delisle (Queens University, Ontario, Canada) and R.L. Leonard (Canterbury, New Zealand) 423

Decomposition pattern of ^{14}C-labeled rice straw in aerobic and submerged rice soils of the Philippines
H.U. Neue (Manila, Philippines) and H.W. Scharpenseel (Hamburg, F.R.G.) 431

Polycondensation of pyrogallol and glycine and the associated reactions as catalyzed by Birnessite
M.C. Wang and P.M. Huang (Saskatoon, Saskatchewan, Canada) 435

APPLIED RESEARCH IN HUMIC SUBSTANCES

Sludge from the waste water of the olive processing industry: A potential soil fertilizer?
C. Saiz-Jimenez (Sevilla, Spain), J.W. de Leeuw (Delft, The Netherlands) and G. Gomez-Alarcon (Madrid, Spain) 445

Effect of tillage on organic matter properties of a soil of central Argentina
A.E. Andriulo, R.A. Rosell and M.B. Crespo (Bahia Blanca, Argentina) . 453

Indexes of humification grade in manures
A. Lax, F. Costa, A. Roig, M.T. Hernández and J. Cegarra (Murcia, Spain) 457

Modifications of the humic acid fraction in a soil treated with composted municipal refuse
F.J. Gonzalez-Vila and F. Martin (Sevilla, Spain) 459

Humic ground water in Denmark
B. Dinesen and J. Beck (Hørsholm, Denmark) 467

Humic acids in coastal aquatic biotopes of Porto Novo, India
H. Shanmukhappa, D.K. Banerjee (New Delhi, India) and K. Krishnamurthy (Porto Novo, India) 469

Organic matter composition in coastal marine sediments from different depositional areas, Italy
S. Guerzoni and G. Rovatti (Bologna, Italy) 477

Temporary disaggregation of particles in coagulation of humic waters
P. Dolejš (Budejovice, Czechoslovakia) 481

Evaluation of the separability of humic substances from water by water treatment
L. Žáček and J. Šorm (Prague, Czechoslovakia) 483

Crop responses from two new Leonardite extracts
J.R. Brownell, G. Nordstrom, J. Marihart and G. Jorgensen (Fresno, CA, U.S.A.) 491
